ACKNOWLEDGEMENT

The most awaited moment of successful completion of an endeavor is always a result of persons involved implicitly or explicitly in it. The successful completion of all the phases of our project is the result of dedicated efforts put in by many people and this report would be incomplete without giving due credits to them. This acknowledgment is but a small token of gratitude in recognition of their help in our endeavor.

We sincerely thank our project guide **Mr. Amit Agrawal** for providing us his precious time, considering our doubts, mostly arose at odd times and providing us the solutions that always takes us out from all the chaos. It has been an honor and pleasure to work under him. Not just the technical knowledge but a lot we have learnt from his calm and composed attitude for which we will remain indebted to sir throughout our life.

We express a deep sense of gratitude to our project coordinator **Mr. Sourabh Dave, Assistant Professor** and **Mr. Ganesh Patidar, Assistant Professor** for their invaluable support and constant encouragement which was of great support to bring this work to present shape.

We are deeply indebted to **Mr. Suresh Jain, Head of Computer Science Department**, who provided us a well-equipped computer laboratory with all required software and library, which was an essential requirement for the success of this project.

We are greatly thankful to **Mr. Sunil K Somani, Director of Medi-Caps University** for their support. Without their support we would not be able to successfully complete this project.

We would like to give our sincere thanks to our Alma mater, **Medi-Caps Institute of Science and Technology** for providing us all the privileges required for building this project.

Last but not the least; we would like to thanks our colleagues, friends and our parents who were a constant and willing source of encouragement and inspiration for us throughout the project.

Rahul Maheshwari

ABSTRACT

Every institution nowadays has a lot of events going on all the time so it is vital for every institution to deliver all these updates to each and every student on time. Currently institutes are bounded by conveying these information through notice boards and messages to the students which makes it difficult and tedious for the institute as well the students as they have to regularly visit notice boards for any updates like attendance list, exam dates, upcoming events, etc. There may be a possibility when the conveyed information by fellow students is rather dubious or not reliable. Although Institutes are very much providing the information to the students through websites and text messages but there is no common medium to get all the information.

This is where Medicaps-Messenger (Me-Me) application comes into play. This application focuses on all the affairs in the University. It aims to aid the students with a common platform which will help them to grab all the updated information effortlessly. This will help students to focus more on their fruitful work instead of giving their valuable time for gathering such information. It also provides a means to allow a student to communicate to other users for any guidance they require.

Use of this application will make the life much easier for all the students and faculties as it would save the time and the efforts and make all relevant information accessible in an effective and sophisticated manner.
